

## Annex 9

### Epidemiological evolution and implementation of the programme

Year	Flocks-total number	Number of controlled flocks	Number of positive flocks	% positivity
2005		115	48	47,7
2008	280	227	24	10,57
2009	283	251	16	6,37
2010	280	262	6	2,29
2011	353	332	6	1,81
2012	378	364	4	1,1
2013	385	383	6	1,57
2014	441	440	9	2,05
2015	426	426	1	0,20
2016	481	481	12	2,5

Comparing the SCP results obtained during the year 2016 with those obtained in the previous year, there has been an increase in the total number of flocks and a fluctuation in the number of positive flocks from 1 to 12. Thus, taking into consideration the targeted serotypes in the programme the prevalence was above the stipulated in community goal set.

The data relating to the total number of flocks, number of controlled flocks and number of positive flocks are in the chart below.

Graph 1 – Evolution number of **laying hens** flocks tested and number of positive flocks
