National Food Safety Standard

Pathogen Limits for Food

1. Scope

This standard provides the indexes for pathogen in foods, limits and testing methods.

This standard applies to pre-packaged foods.

This standard does not apply to canned foods.

2. Principles for implementing the standard

2.1 With or without pathogen limits, the food producers, processors and traders shall take control measures to reduce the pathogen level in foods and the possibility of causing risks.

2.2 After taking samples according to provisions of the GB4789.1, the sample shall be tested according to the testing methods in the Table 1.

3. Index Requirements

Table 1 shall be referred to for the pathogen limits for food.

Note 1: the food categories are used to define the scope for applying the pathogen limits; (the categories) are only effective in this standard;

Note 2: "n" is the number of samples taken in one batch of products; "c" is the maximum number of samples allowed over the "m" value; "m" is the tolerant limit of pathogen indexes; M is the highest safe limit of the pathogen indexes.
