

Annex 9

Epidemiological evolution and implementation of the programme

Year	Flocks - total number	Number of controled flocks	Number of positive flocks	% positivity
2010	500	20	0	0,00
2011	510	504	1	0,20
2012	833	833	3	0,36
2013	813	813	4	0,49
2014	888	887	1	0,11
2015	906	906	2	0,22
2016	1155	1155	4	0,34

Comparing the SCP results obtained during the year 2016 with those obtained in the previous year, there has been an increase in the total number of flocks and a fluctuation in the number of positive flocks from 2 to 4. Thus, taking into consideration the targeted serotypes in the programme the prevalence was lower than the stipulated in community goal set.

The data relating to the total number of flocks, number of controlled flocks and number of positive flocks are in the chart below.
