		Implant date:	

Rabies Vaccination and Serology

RABIES VACCINATION			RABIES SEROLOGICAL TESTING		
Date of vaccination (dd/mm/yy)	Vaccine make and serial number	Vaccination valid until (dd/mm/yy)	Date of sampling	Name and address of the official diagnostic laboratory	Result of the antibody titration test [IU/ml]
Previous vaccination					

Other Vaccinations (Mandatory: DHP {Dogs}, FVRCP {Cats})

Date of vaccination	Vaccine type

Microchip Number:

Veterinary Declaration

1. I am a veterinarian accredited to provide export certification on behalf of the Government Veterinary Service.
2. I hereby certify that I have examined the above-described animal today, being not more than fourteen (14) days prior to the proposed date of export, and find that:
 - a. As best as can be ascertained, the animal(s) is/are not infected with any communicable disease, is free from external parasites and in my opinion is fit to travel.
 - b. The animal was vaccinated against rabies with an approved inactivated or recombinant vaccine (as per the guidelines outlines in Appendix VI of the conditions governing the importation of dogs and cats into the Cayman Islands).
 - c. After due enquiry, I am satisfied that: *(delete statements which are not applicable)*
 - i. The animal(s) has/have been resident in the country of export since birth, or continuously for the past three (3) months; or
 - ii. The animal(s) has/have been in one or more 'no' rabies-risk countries for the past three (3) months; or
 - iii. The animal(s) has/have been in one or more 'low' rabies-risk countries for the past three (3) months; or
 - iv. The animal(s) has/have been in one or more 'high' rabies-risk countries for the past three (3) months
 - v. The animal(s) was/were originally from the Cayman Islands
 - vi. The animal(s) is/are travelling by sea
 - vii. Country of origin of animal(s) {if different from country of export}: _____
 - d. After due enquiry, I am satisfied that the animal(s) has/have not been present within the past three (3) months in an officially quarantined or designated rabies area.
 - e. The animal has been treated on the day of examination with the following acaricidal preparation, which is known to have residual action against ticks:
Name of product:
 - f. The animal has been treated on the day of examination with a preparation containing praziquantel at a dose rate of 5mg/kg body weight, which is known to be effective against tapeworms.
Name of product:
 - g. The microchip(s) was/were scanned at the time of physical examination and prior to the administration of tick and tapeworm treatment.
 - h. The animal(s) was/were subjected to a neutralising antibody titration test within the past 12 months with a result of 0.5IU/ml or greater and I have seen a record of this result.

Microchip Number:

Transport

1. Animals traveling by air must be carried in an approved carrier which meets the standards set out by IATA
2. All documents must be affixed to the container
3. **If traveling through a prohibited country or territory as outlined in Section D1** of the Conditions Governing the importation of dogs and cats into the Cayman Islands, the door of the carrier has been sealed with a government-approved seal in the exporting country before the animal is loaded onto the aircraft.
