HEALTH INFORMATION

I, the undersigned official Veterinarian, certify that the animal above described meets the following requirements:

1 - The dog showed no clinical signs of Rabies and other infectious diseases the day prior to shipment or on the day of shipment.

AND EITHER

- a) The dog was vaccinated or revaccinated in accordance with the recommendations of the manufacturer, with a vaccine that was produced in accordance with the Terrestrial Manual and;
- b) was subjected not less than 3 months and not more than 12 months prior to shipment to an antibody titration test as prescribed in the Terrestrial Manual with a positive result of at least 0.5 IU/ml in an OIE Reference laboratory for Rabies.

OR

was kept in an approved quarantine station for six months prior to shipment under supervision of Veterinary Authority of Portugal.

2 - If a female dog, it is not pregnant.

(Puppies born in quarantine shall be destroyed without compensation)

3 - The dog has been treated with a long lasting insecticide against ectoparasites and that it is free from external parasites at the time of export.

Name of the product:

4 - The dog was vaccinated against Distemper/Hard Pad Complex (maladie de Carre), Infectious Hepatitis, Leptospirosis and Canine Parvovirus Infection not less than two weeks prior to the date of despatch by air and certified accordingly by a Veterinary Surgeon duly registered in the country of origin stating the make of the vaccine(s) used, the batch number and the date of its expiry and the date on which the said dog was vaccinated.

5 - The dog has been tested and found to be free from ehrlichiosis within 45 days prior to departure using the indirect fluorescent antibody test.

6 - The dog has been tested for Brucella Canis using the slide agglutination test (Microscopic agglutination test) with a negative result.

This certificate is valid for 10 days from the date of issue.

NOTES:

The dog must come on an IATA approved kennel and not on leach and only by direct air service to Mauritius (no transit en route is permitted).

The dog will be quarantined for a minimum period of five working days at Division of Veterinary Services, Reduit, Mauritius.
