

ERICC

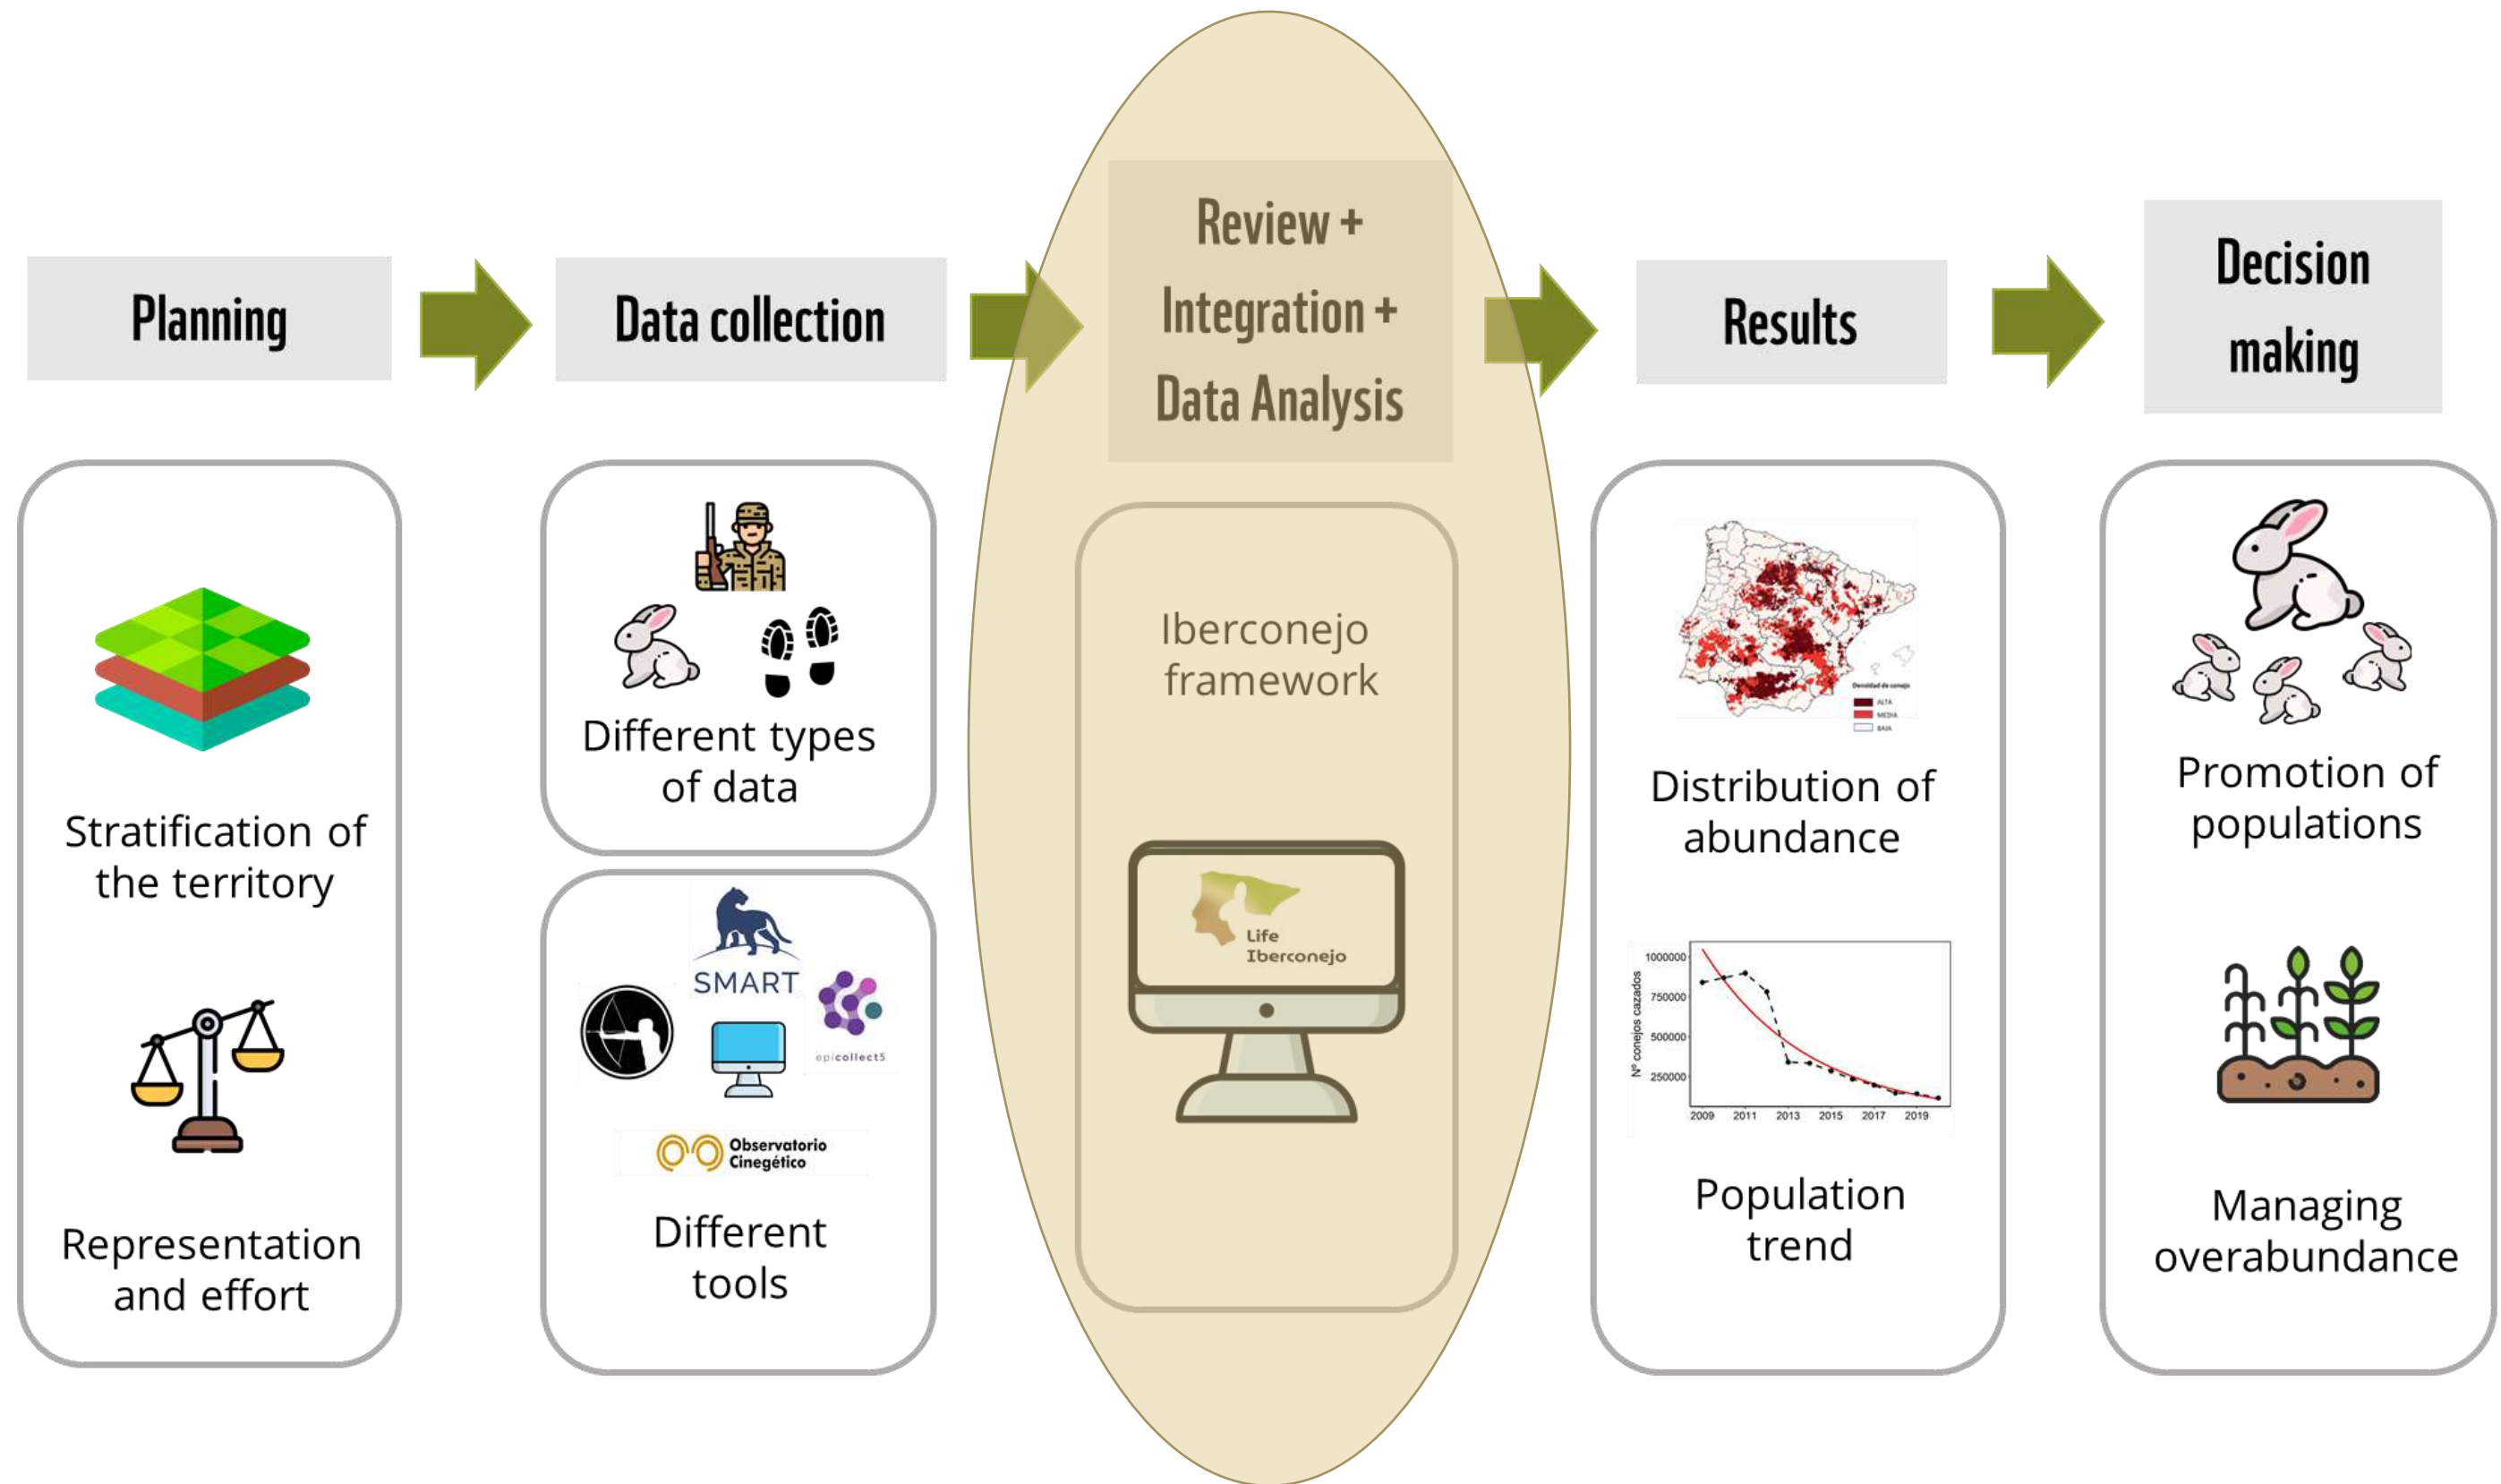

Continuity of the European rabbit
monitoring systems

 Monitoring Systems
Iberian standardized protocols of rabbit monitoring

 Monitoring Systems
Iberian standardized protocols of rabbit monitoring

Monitoring Systems

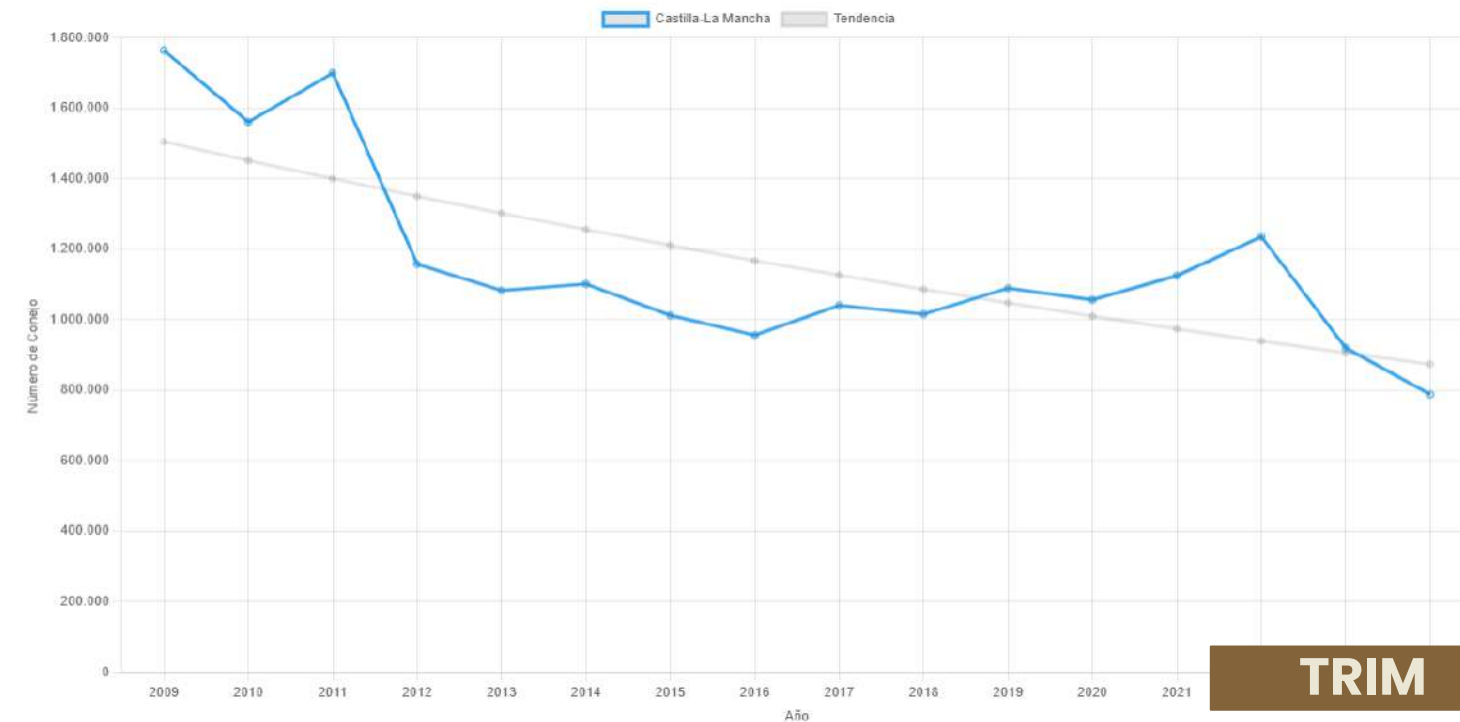

Iberian standardized protocols of rabbit monitoring

Platform Updates:

- TRIM and GLMM Trend Analysis

Tendencias - Bolsas de caza / Trim / Castilla-La Mancha (Serie completa)

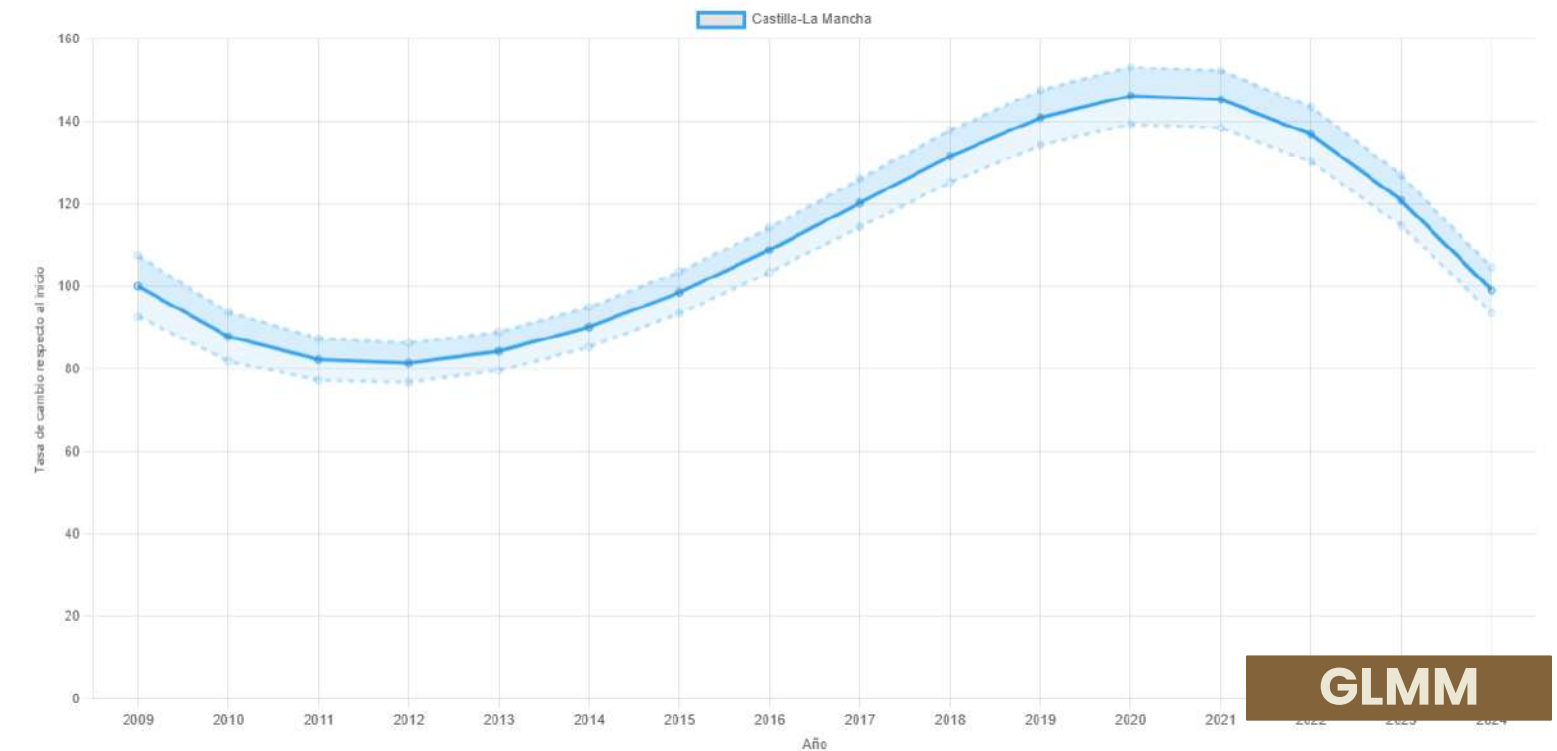

Resultado	Moderate decrease		Porcentaje	Error
Año inicial de la serie	2009	Cambio total	-41,6%	±1,38%
Año final de la serie	2024	Cambio anual promedio	-3,31%	±0,09%

TRIM

Tendencias - Bolsas de caza / GLMM / Castilla-La Mancha (Serie completa)

Resultado	neutra		Porcentaje	Error
Año inicial de la serie	2009	Cambio total	-0,98%	±18,06%
Año final de la serie	2024	Cambio anual promedio	-0,08%	±1,13%

GLMM

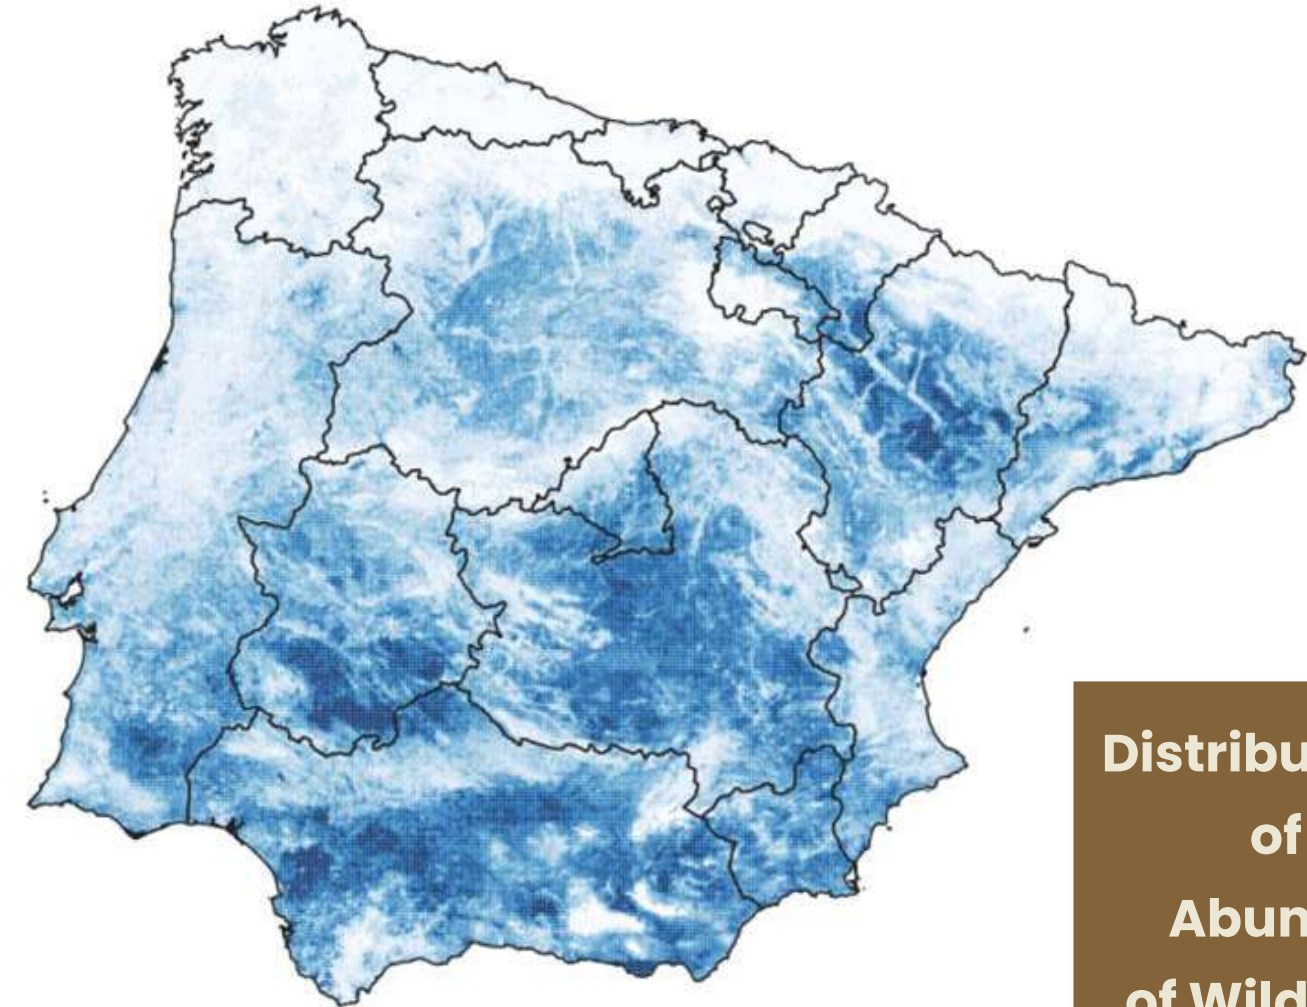

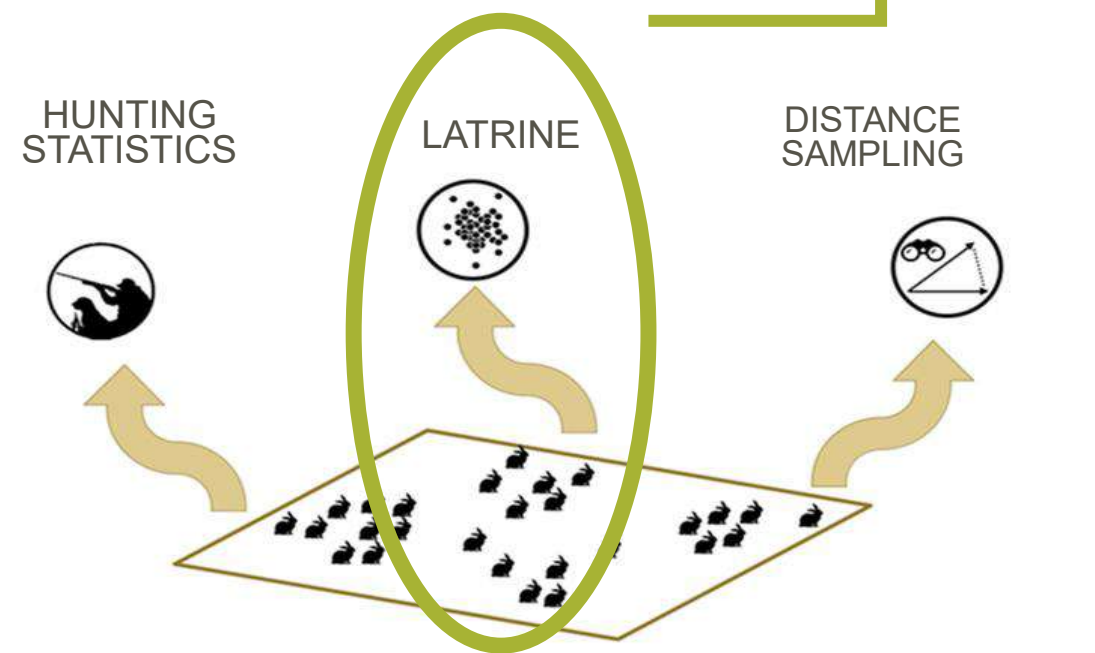

Monitoring Systems

Iberian standardized protocols of rabbit monitoring

Platform Updates:

- TRIM and GLMM Trend Analysis
- Hierarchical Model with Latrines

**Distribution Map
of the
Abundance
of Wild Rabbits**

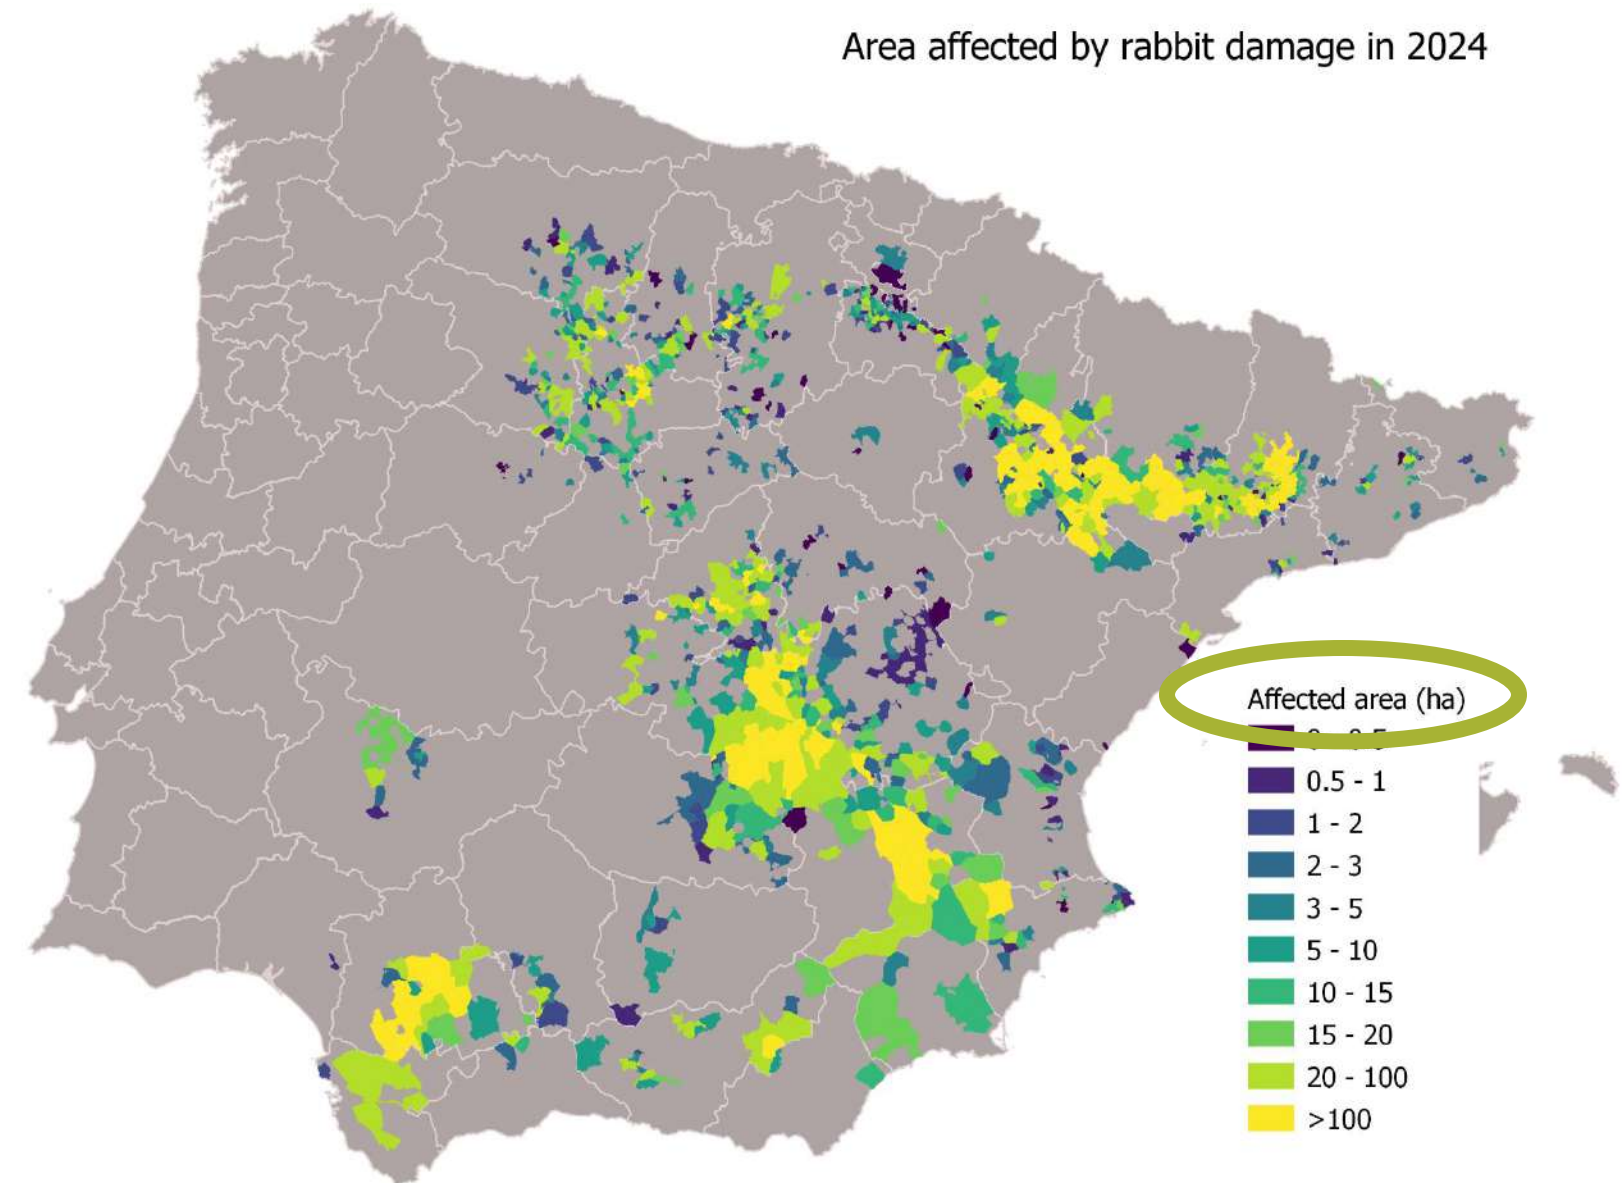

Monitoring Systems

Iberian standardized protocols of rabbit monitoring

Platform Updates:

- TRIM and GLMM Trend Analysis
- Hierarchical Model with Latrines
- Damage Map Visualization

Area affected by rabbit damage in 2024

Monitoring Systems

Iberian standardized protocols of rabbit monitoring

Platform Updates:

- TRIM and GLMM Trend Analysis
- Hierarchical Model with Latrines
- Damage Map Visualization
- Data and Reports download from the Platform available soon

Monitoring Systems

Iberian standardized protocols of rabbit monitoring

Feeding the beast: Currently state of the platform

Platform =

Data =

Results =

Monitoring Systems

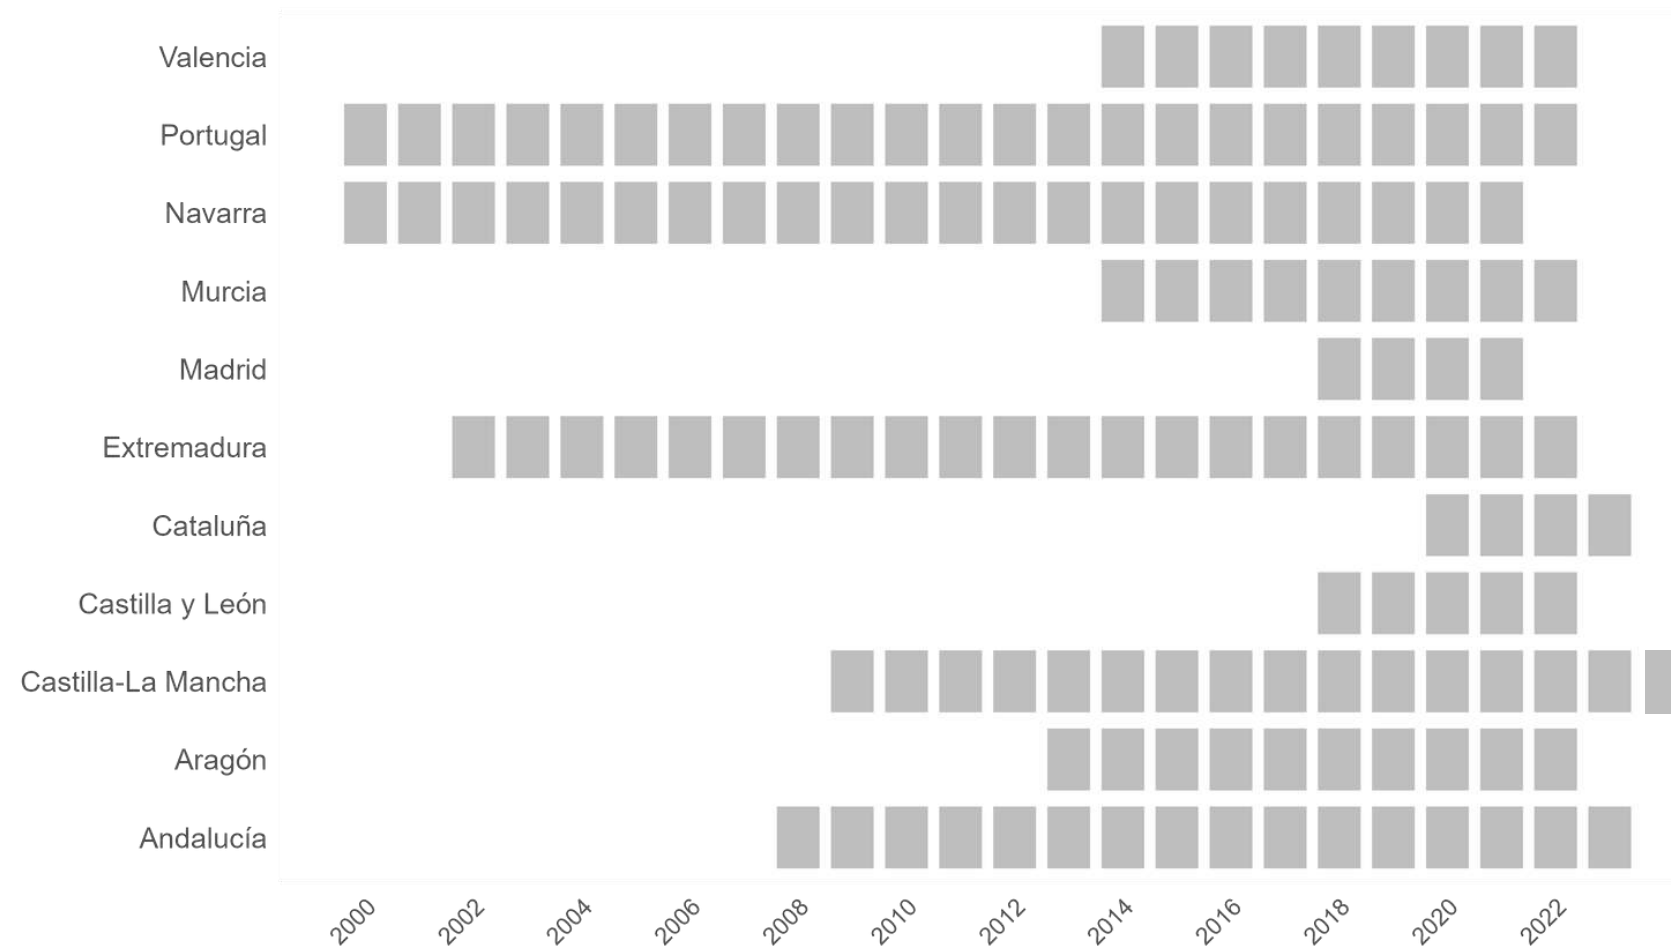

Iberian standardized protocols of rabbit monitoring

Feeding the beast: What data has already been uploaded?

- Hunting yields

Conejo

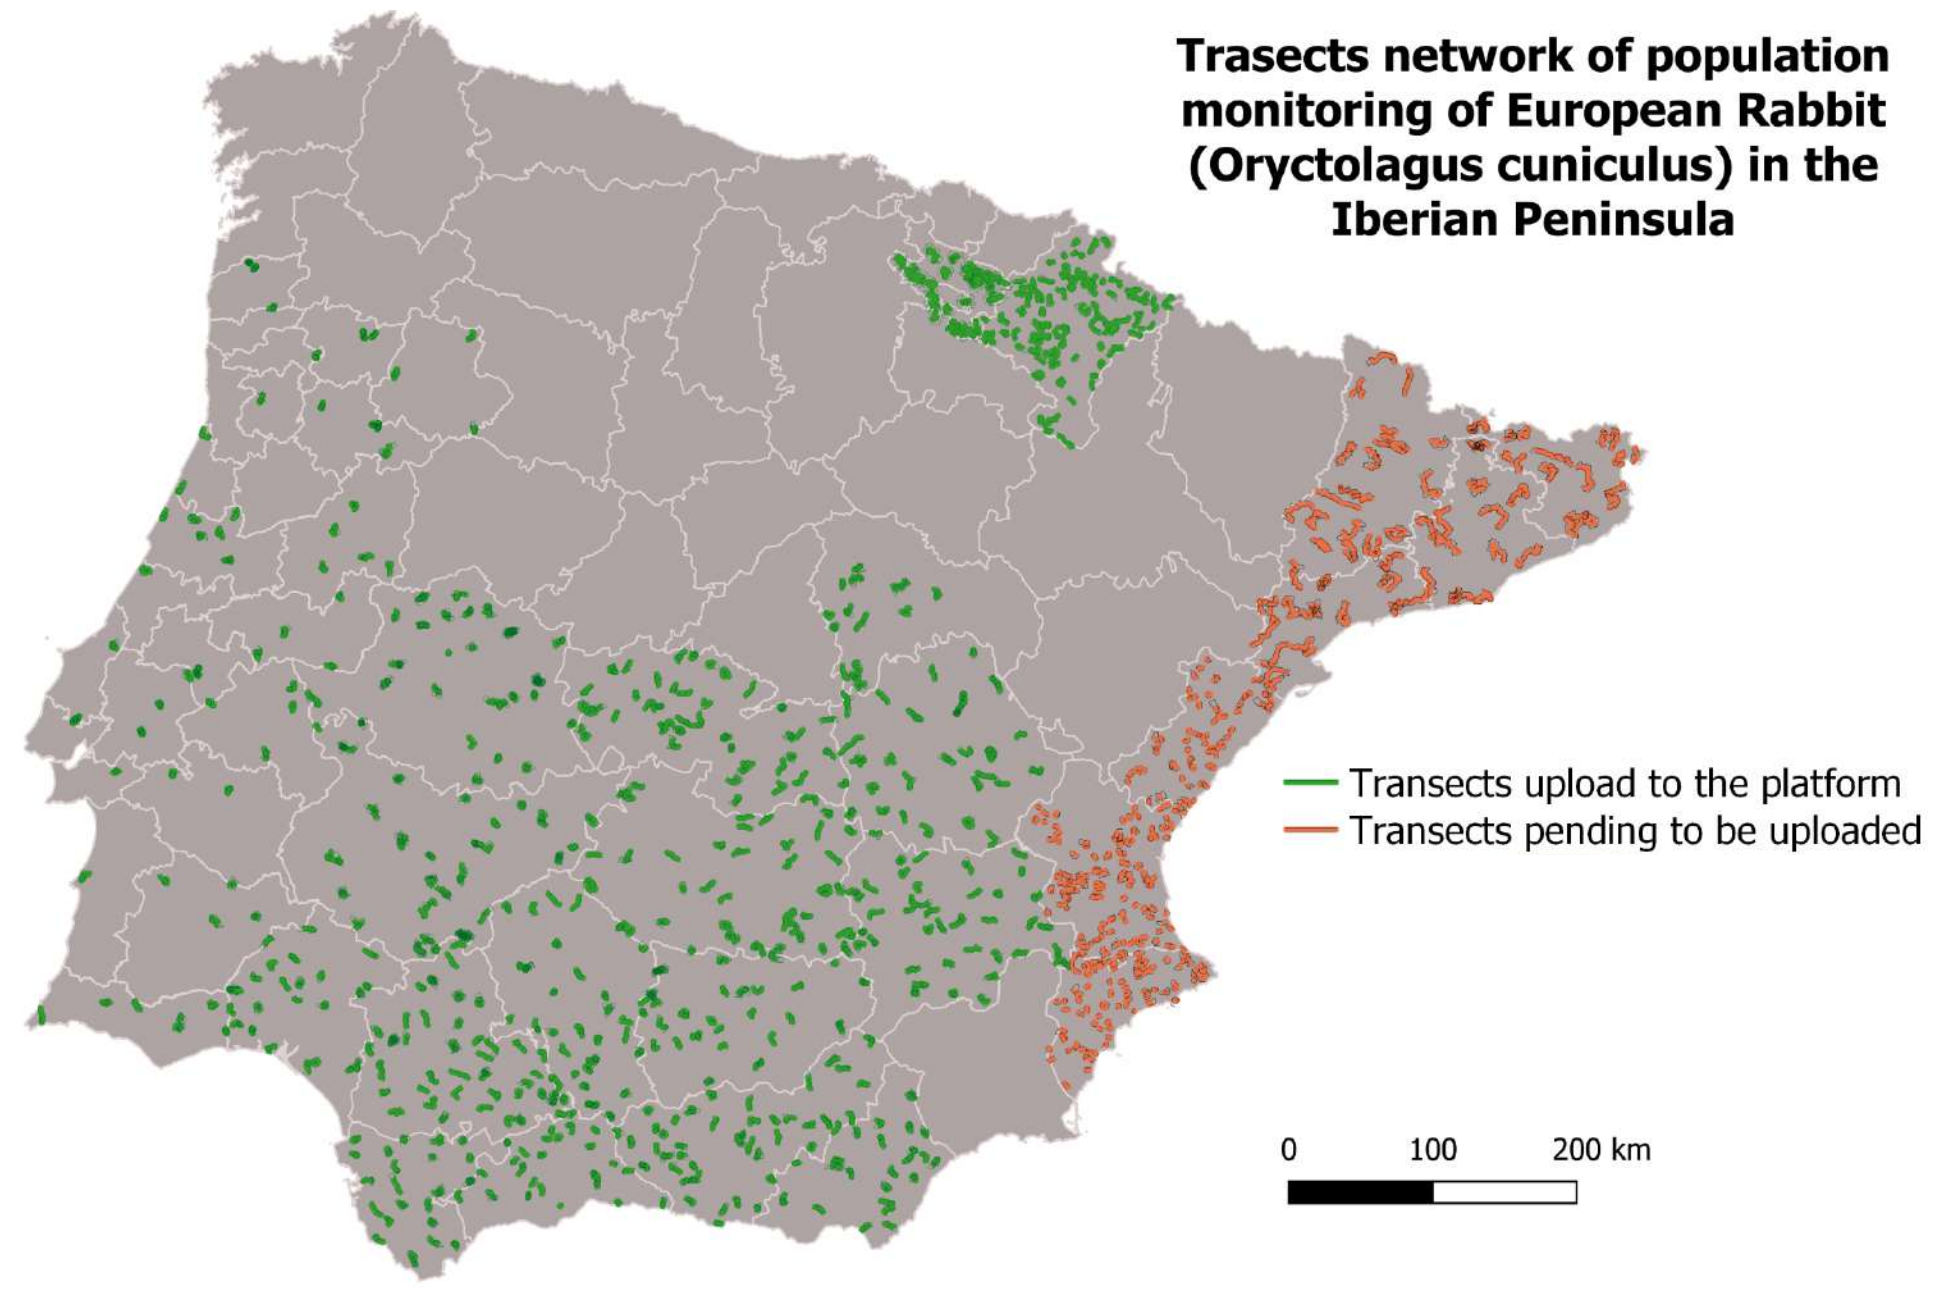

Monitoring Systems

Iberian standardized protocols of rabbit monitoring

Feeding the beast: What data has already been uploaded?

- Hunting yields
- Distance sampling

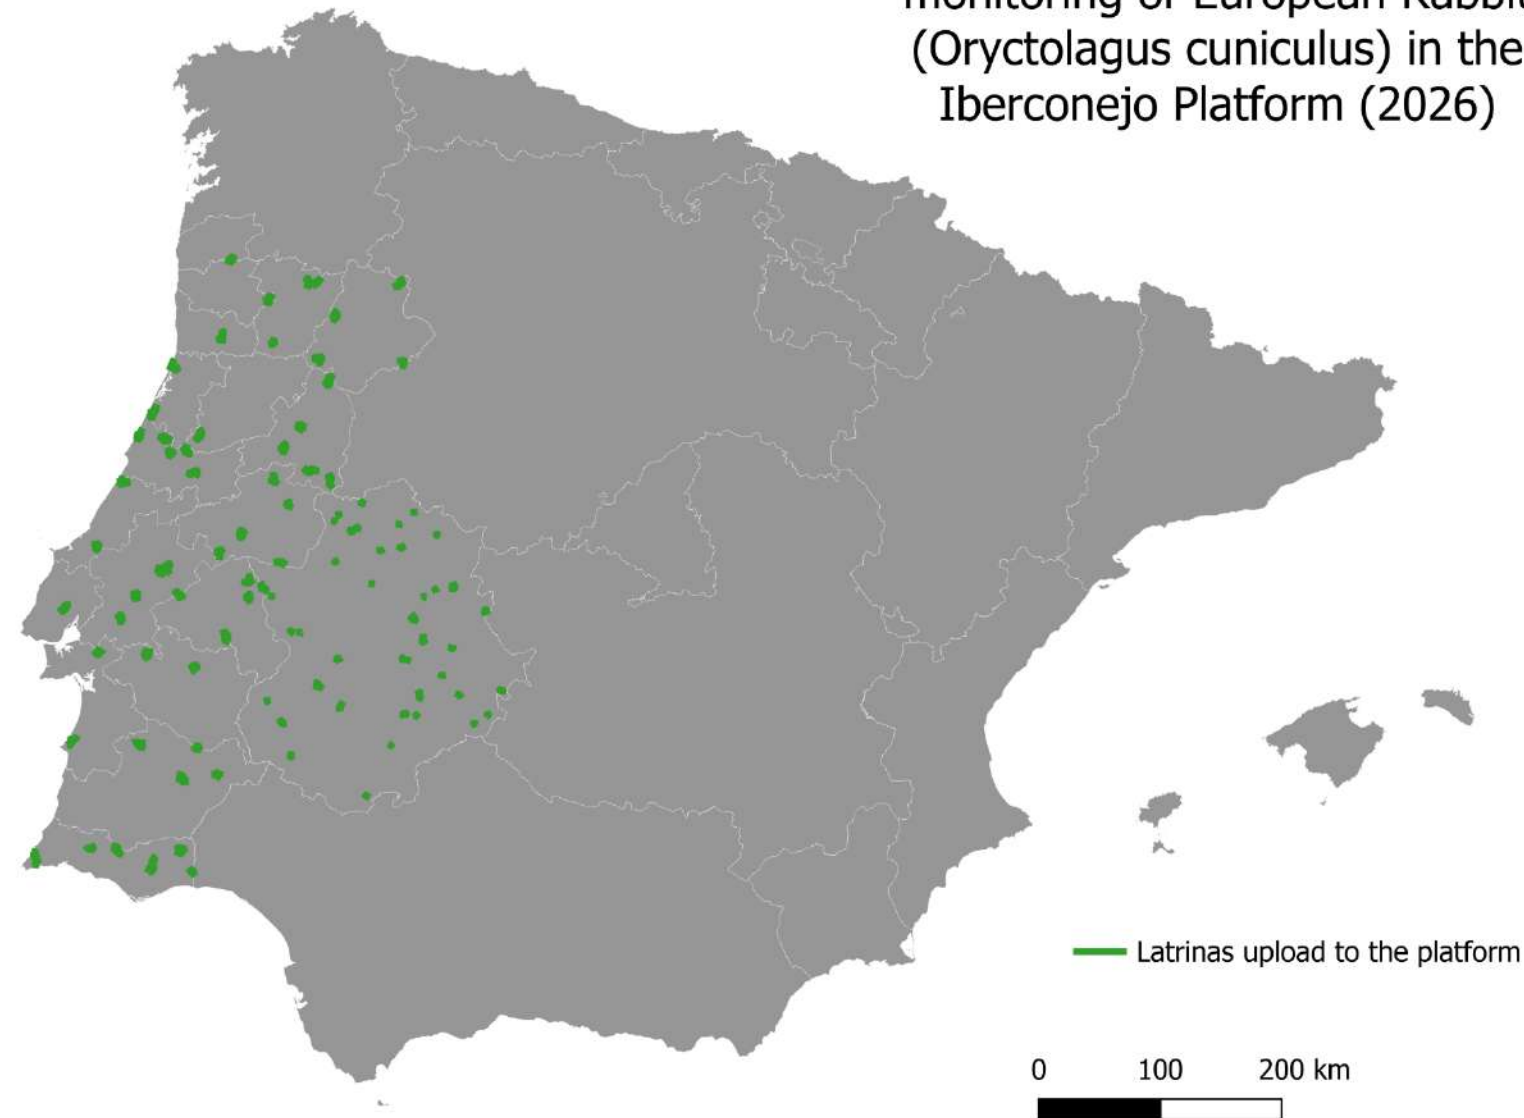

Monitoring Systems

Iberian standardized protocols of rabbit monitoring

Feeding the beast: What data has already been uploaded?

- Hunting bags
- Distance sampling
- Latrines counts

Latrine network of population monitoring of European Rabbit (*Oryctolagus cuniculus*) in the Iberconejo Platform (2026)

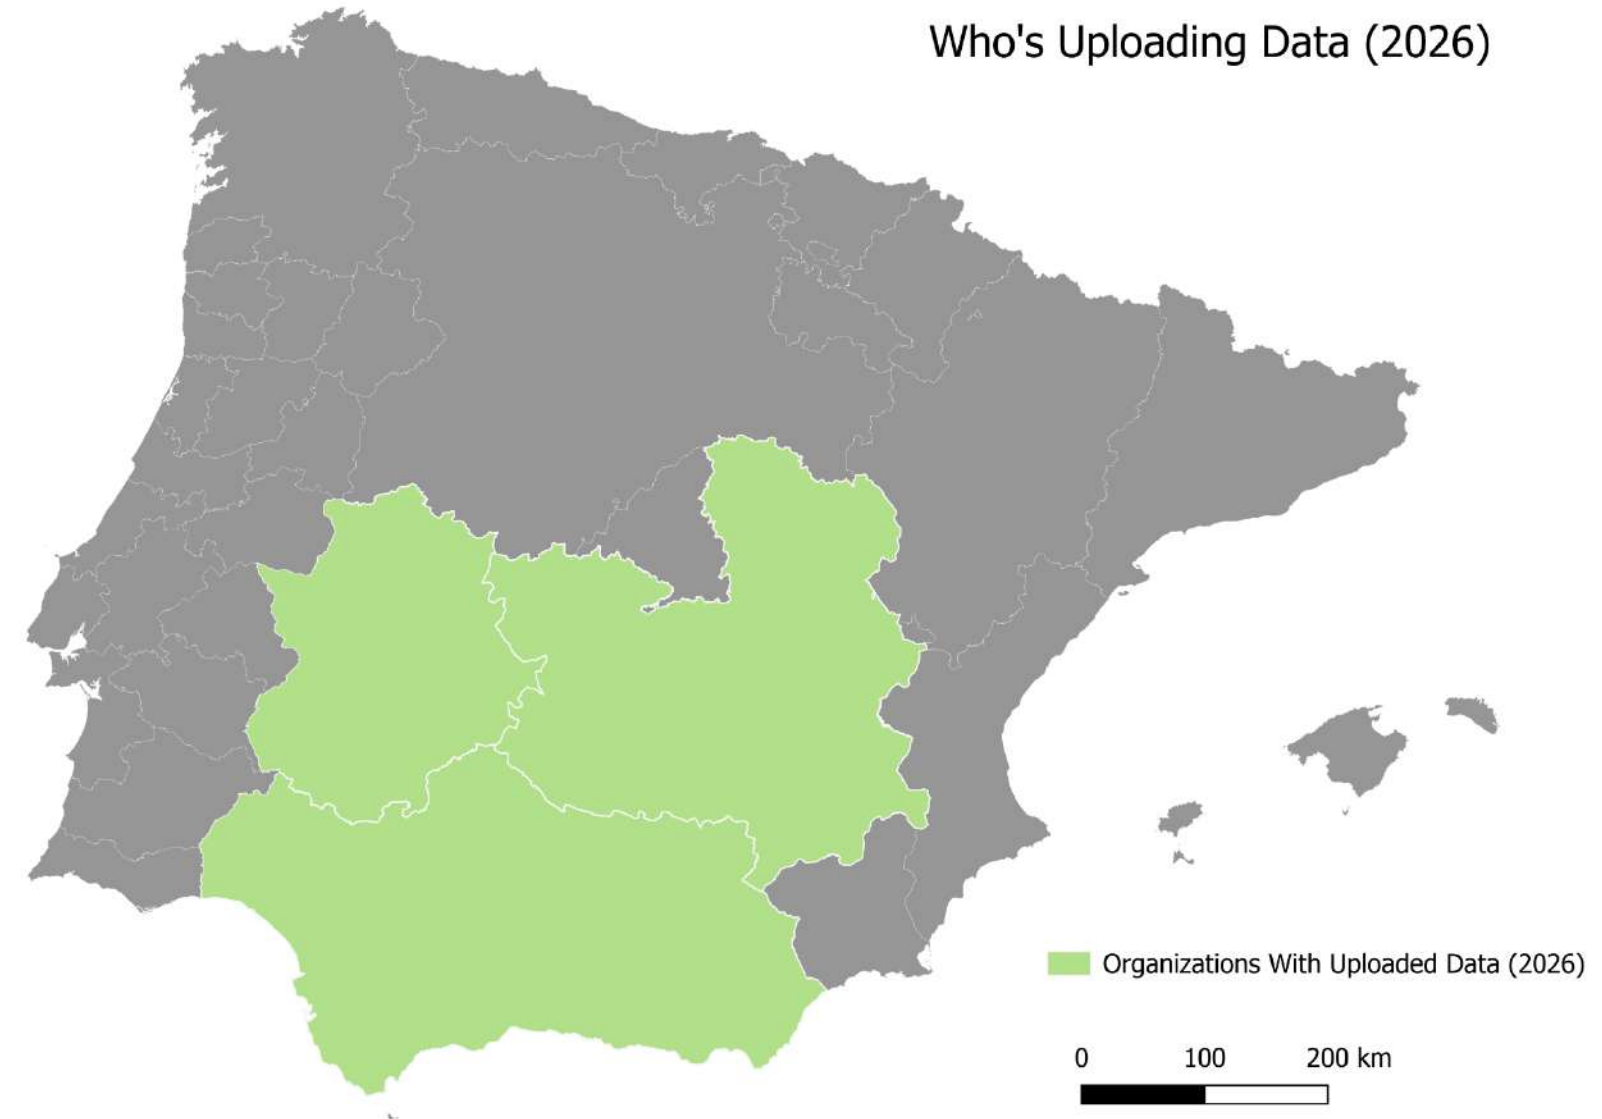

Monitoring Systems

Iberian standardized protocols of rabbit monitoring

Feeding the beast: Who is uploading data?

Who's Uploading Data (2026)

NEXT STEPS:

- 1) Train technicians to upload data to the platform

NEXT STEPS:

- 1) Train technicians to upload data to the platform
- 2) Establish new distance sampling tracks

NEXT STEPS:

- 1) Train technicians to upload data to the platform
- 2) Establish new distance sampling tracks
- 3) Train rangers to conduct distance sampling and latrine counts

0 100 200 km

NEXT STEPS:

- 1) Train technicians to upload data to the platform
- 2) Establish new distance sampling tracks
- 3) Train rangers to conduct distance sampling and latrine count
- 4) Transfer the monitoring system (Platform included) to other species:

ODISEC project

Take home messages

Platform improvement tasks currently in development but...

Need for maintenance = funding to ensure continuity

Need to continue feeding data into the platform

Expansion of monitoring networks

Training for public administration staff → 2026

Take home messages

THANK YOU
